Ibn Majid General Company is a company specialized in the manufacture of heavy engineering equipment to meet the requirements of the oil sector companies in addition to both the electricity sector and the industrial sector, with its specialization in the manufacture of marine vessels

And river sections and iron dams specialize in the manufacture of structures, bridges and iron sections.

The company has all the human capabilities and technical expertise necessary to carry out on-site construction and rehabilitation of oil projects, electric power stations, iron bridges and iron platforms for oil export.

Mohammed Al Hijaj

Our people make the difference in the success of your project. At IMCO , we live our core values and you'll see them in everything we do. Those values-- safety, integrity, quality, stewardship, positive relationships and community service-- are a natural fit with what's important to you.

COMPANY HISTORY

Ibn Majid State Company was established in 1990

It was built by Iraqi companies and equipped for two years with machinery and equipment imported from outside Iraq

The expansions and additions of the company are:

- Establishment of a factory for the manufacture of heat exchangers.
- Maintenance and repair of machinery and equipment for entities, including rolling factories and cranes.
- The design and production capacity of the company was (5000) tons of iron per year, which increased to (7000) tons per year
- The company stopped for the period (2004-2003) due to the military operations that took place on 2013/20/3 and the looting that accompanied them.

PRODUCTION CAPACITY.

- Design production capacity: 11,000 tons
- Available capacity: 9000 tons
- The products of Ibn Majid Company are important products and there is an increasing demand for the company's products and services according to the current working conditions, future conditions and economic development in the country
- The company aims to reach the maximum capacity of 11,000 tons and more.

Organization Chart

COMPANY FACILITIES

1- AL SALAM FACTORY

This plant This plant specializes in the manufacture of naval vessels and steel structures for bridges weighing more than 10 tons. naval vessels, steel structure for bridges that more than 10 tons weight

This plant specializes in the manufacture of different types of storage vessels and other kinds of steel structure up to 10 tons weight

COMPANY FACILITIES

3- AL WAFAA FACTORY

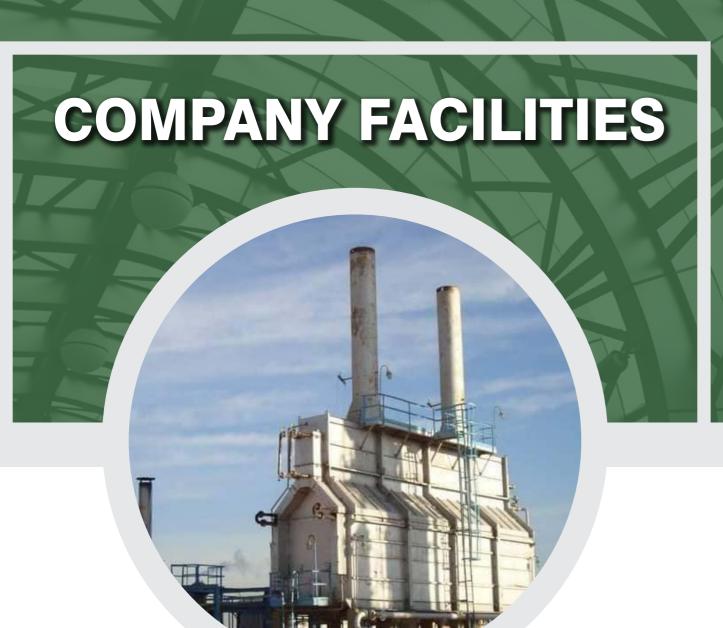

This plant specializes in the manufacture of different types of storage vessels and other kinds of steel structure up to 5 tons weight

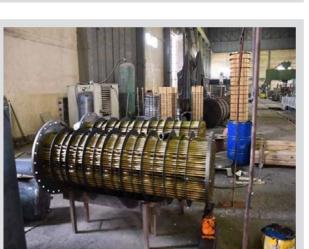

Design, manufacture and repair of heat exchangers for all types and sizes and capacities, manufacturing convex endings

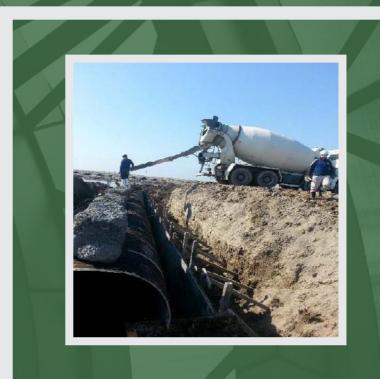

A -Supply plain concrete for base of steel pipe culverts using sulphate resistant cement with compressive strength of no less than 21 MPa with mix ratio of (924 1:1:5:3M3

The steel pipe culverts available in North Romaila. IMCO collected this material, transport and connect the parts of plates to be cylinder and to be of 22 meter length or more on each cylinder.

B-Supply local soil without compaction to cover the pipes on the 103 Row on the west and east side 2 meters deep and 3 meters width in approximate 60000 M3

C-Supply local soil with compaction under supervision of supervising engineer – each 25 cm layer of row79000 103-102-101 M3

Civil works for the establishment of the foundations of the tanks in the Maysan Oil Company

Civil works to covering by reinforcement cement the Shatt al-Swaib crossing in the Majnoon field

2- AL-FAO STORAGE TANKS

Our company has contracted with the Basra Oil Company to set up and installation eight (8) Floating Roof storage tanks (58,000 m3 each) and pipe system with booster pumps for FAO Depot, Basra $\,$

- IRAQ And this project have a lot of civil works such as.

1- THE ESTABLISHMENT OF ROADS

2-THE FOUNDATIONS OF TANK BY MODERN WAY TO STRENGTHEN THE FOUNDATION BY DEEP MIXING CEMENT INJECTION

3-BUILDING CONTROL STATION FOR EIGHT TANKS

4-WORKS POURED AND INSTALLATION OF CONCRETE SUPPORTING FOR PIPELINES

5-CREATE DYKE AROUND EACH TANK 3M HEIGHT AND 5.5 M WIDTH COMPACTED

3- ELECTRICAL PROJECT

4- GAS & OIL SECTOR

5- AL-TANOMA BRIDGE

ONE OF THE MOST IMPORTANT BRIDGES IN BASRA GOVERNORATE CENTER IS CHARACTERIZED BY THE FOLLOWING SPECIFICATIONS:

- LENGTH: 440 METERS
- WIDTH: 9.6 METERS

- NAVIGATIONAL APERTURE: 60 METERS

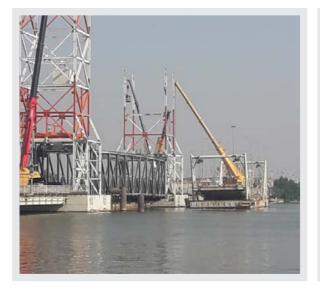

- TOWER HEIGHT: 45 METERS - NUMBER OF PILLARS: 80

6- SUPPLY, INSTALLATION AND OPERATION OF FLOATING PUMPS

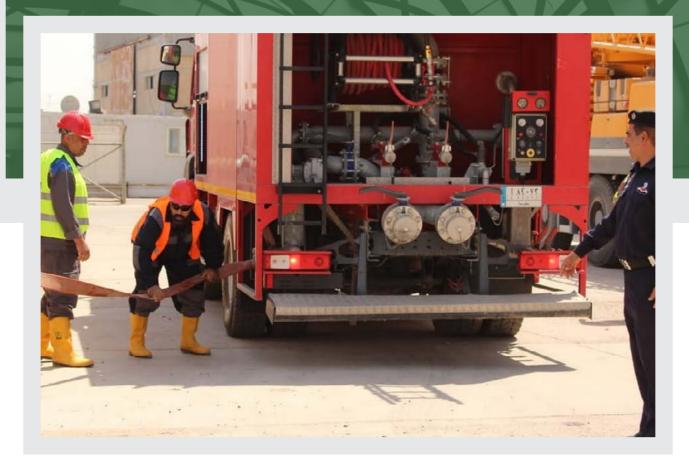

HSE PLAN

Safety and responsibility of each individual in his work site and linked to his relationship with around him such as people, machines, tools, materials, and methods of operating, and others.
